INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.
PCT/US04/11061**Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement****1. Statement**

Novelty (N)	Claims <u>1-19</u>	YES
	Claims <u>NONE</u>	NO
Inventive Step (IS)	Claims <u>1-19</u>	YES
	Claims <u>NONE</u>	NO
Industrial Applicability (IA)	Claims <u>1-19</u>	YES
	Claims <u>NONE</u>	NO

2. Citations and Explanations (Rule 70.7)

Claims 1-19 meet the criteria set out in PCT Article 33(2)-(3), because the prior art does not teach or fairly suggest the claimed invention.

The claims are drawn to a method of forming a peptide conjugate and a modifying group where the modifying group is conjugated to the peptide via glycosyl linkage. The method involves contacting a cell with a modified sugar and on modifying group, incubating the cell so the cell internalizes modified sugar and intracellularly contacting said modified sugar with a glycosylated peptide and glycosyltransferase.

The prior art of Neose Technologies (WO03/017949), disclose glycosyltransferase reactions to make synthetic ganglioside compounds. However, the prior art does not teach nor suggest the claimed invention because the reference does not teach the conjugation of a peptide to a modifying group. Thus, the claimed invention is both novel and unobvious over the prior art of record.

Claims 1-19 meet the criteria set out in PCT Article 33(4), and thus have industrial applicability because the subject matter claimed can be made or used in industry.
